Summary

Motivated Artificial Intelligence and Machine Learning engineering student with hands-on experience building and deploying machine learning models using Python. Currently pursuing B.Tech in AI/ML at P P Savani University with a strong foundation from a Diploma at GTU. Passionate about developing scalable AI solutions, deep learning systems, and applying data-driven approaches to solve real-world problems. Eager to contribute to Google's mission of organizing the world's information through cutting-edge ML research and engineering.

Education

P P Savani University — Surat, Gujarat, India
Bachelor of Technology – Artificial Intelligence & Machine Learning — *2025 – 2029 (Expected)*

Gujarat Technological University (GTU) — Gujarat, India
Diploma in Engineering — *2021 – 2025*

Technical Skills

Languages: Python, SQL, C/C++
AI/ML Frameworks: TensorFlow, Keras, Scikit-learn, NumPy, Pandas, Matplotlib, Seaborn
ML Concepts: Supervised Learning, Unsupervised Learning, Neural Networks, Deep Learning, NLP, Computer Vision, Model Evaluation & Optimization
Tools & Platforms: Jupyter Notebook, Google Colab, Git, GitHub, VS Code, Linux
Databases: MySQL, SQLite

Projects

Image Classification System | *Python, TensorFlow, CNN* — 2024

- Designed and trained a Convolutional Neural Network (CNN) to classify images across 10 categories, achieving over 90% accuracy on the test dataset.
- Implemented data augmentation techniques to reduce overfitting and improve generalization by 15%.
- Optimized model architecture using hyperparameter tuning, reducing inference time by 20%.

Natural Language Processing – Sentiment Analysis | *Python, Scikit-learn, NLTK* — 2024

- Built an NLP pipeline to classify customer reviews as positive or negative using TF-IDF and Logistic Regression, achieving 88% accuracy.
- Preprocessed and cleaned a dataset of 50,000+ records, including tokenization, stopword removal, and lemmatization.
- Compared multiple ML models (Naive Bayes, SVM, Random Forest) and selected the best-performing approach based on F1-score.

Predictive Analytics Dashboard | *Python, Pandas, Matplotlib, Scikit-learn* — 2023

- Developed an end-to-end machine learning pipeline to predict outcomes from structured datasets with 85% accuracy using Random Forest and Gradient Boosting.
- Performed exploratory data analysis (EDA) and feature engineering, reducing dimensionality by 30% with PCA.
- Visualized insights through interactive dashboards enabling data-driven decision-making.

Chatbot with NLP | *Python, NLTK, Rule-based & ML Hybrid* — 2023

- Designed and deployed a hybrid rule-based and ML-powered chatbot capable of handling 200+ user intents.
- Integrated intent recognition using TF-IDF vectorization and cosine similarity for context-aware response generation.

Certifications & Achievements

Certifications

- Machine Learning – Stanford University / Coursera (Andrew Ng)
- Deep Learning Specialization – Coursera (DeepLearning.AI)
- Python for Data Science and AI – IBM / Coursera
- TensorFlow Developer Certificate – Google (In Progress)

Achievements

- Completed GTU Diploma with a focus on programming and applied mathematics, building a strong engineering foundation for AI/ML work.
- Developed and deployed multiple ML projects independently, demonstrating self-driven learning and applied research skills.
- Active contributor to open-source AI projects on GitHub.
